ECON 322: Introduction to Econometrics

Fall 2017
Rutgers University
Department of Economics

Instructor

Yuan Liao
New Jersey Hall, Office 301B
75 Hamilton St, New Brunswick, NJ 08901
yuan.liao@rutgers.edu

Class Meetings

Lecture: Mondays and Wednesdays 1:10 -2:30pm, Academic Building (AB) 4450

Office Hour

Tuesdays and Wednesdays 3:00 PM - 4:00 PM and by appointment.
Course website on Adobe Connect: https://meetings.rutgers.edu/econ322

Prerequisite

It is expected that all students will have taken an introductory statistics class (e.g. 960:211 or 960:285), Calculus I (640:135 or 640:151), and principles of economics courses covering both microeconomics and macroeconomics (e.g. 220:102 and 220:103 or 220:200). Especially, students without a good command of the materials on introductory statistics will meet a lot of challenges in assignments and exams.

Final Exam Date : December 20, 2017, 8am- 11am.

Make-up exams

(for both midterm and final exams) will be given only in the event of legitimate excuses for missing an exam. “Legitimate excuses” here mean university recognized absences, and often only refer to medical emergency and religious events. You should discuss with me about your legitimate excuses (except for medical emergency) at least one week ahead of time. Other excuses such as “attending best friends’ weddings” are not acceptable.

Course Overview & Learning Outcomes

Econometrics is a set of statistical tools used to analyze economic relationships using economic data. The methods taught in this introductory course can also be employed in the business disciplines of accounting, finance, marketing and management and in many social science disciplines.
Students who successfully complete Econ 322 should be comfortable with basic statistics and probability. They should be able to use a statistical/econometric computer package to estimate an econometric model and be able to report the results of their work in a nontechnical and literate manner. In particular a student who successfully completes Econ 322 will be able to estimate and interpret linear regression models and be able to distinguish between economic and statistical importance. They should be able to critique reported regression results in applied academic papers and interpret the results for someone who is not trained as an economist.

Textbook

MyEconLab

The class will be using MyEconLab for homework assignments and exams. The bundle of the textbook and the access to MyEconLab can be purchased online or from the bookstore (around $65.)

Computings

Examples in class will be coded in Matlab. Matlab is free to access on the Rutgers University Software Portal. Students can also choose their own packages to work on the assignments.

Lecture outline

1. Introduction
   
   Brief introduction to course; Sources of data.

2. Review of Statistical Concepts
   
   Expected value
   
   The joint, marginal density, conditional density and independence
   
   Covariance and correlation
   
   The Normal density
   
   Hypothesis tests, confidence intervals

3. The Simple Linear Regression Model
   
   The econometric model
   
   Estimating the model and interpreting the results
   
   Inference and prediction in the Simple Linear Regression Model

   **Midterm**

4. The General Linear Regression Model
   
   Estimating and interpreting the results
Interactions among dependent variables
Nonlinear effects

5. Assessing Regression Models
   Omitted variable bias
   Errors in variables bias
   Sample selection bias
   Simultaneous causality bias

6. Additional Topics in Regression
   Regression Models with Binary Dependent Variable
   Instrumental Variable estimation
   Panel data and time series models

Policy on Attendance

Students are expected to attend all classes. If you expect to miss more than one or two classes because of illness or a family emergency, please use the University absence reporting website to indicate the date and reason for your absence. An email is automatically sent to me.

https://sims.rutgers.edu/ssra/

No need to report absence for excused religious holidays:

http://www.state.nj.us/education/genfo/holidays1718.pdf

Assessment

The grading is based on three parts:

<table>
<thead>
<tr>
<th>Items</th>
<th>%</th>
</tr>
</thead>
<tbody>
<tr>
<td>weekly assignment</td>
<td>25%</td>
</tr>
<tr>
<td>quiz &amp; attendance</td>
<td>5%</td>
</tr>
<tr>
<td>midterm exam</td>
<td>30%</td>
</tr>
<tr>
<td>final exam</td>
<td>40%</td>
</tr>
</tbody>
</table>

- There will be 2-3 in class quiz given randomly without announcements. Quiz are mainly designed to motivate attendance.
- **Weekly assignment** is due in a week.
Table 2: Grading scale

<table>
<thead>
<tr>
<th>Items</th>
<th>%</th>
</tr>
</thead>
<tbody>
<tr>
<td>≥ 90%</td>
<td>A</td>
</tr>
<tr>
<td>[80, 90)%</td>
<td>B or B+</td>
</tr>
<tr>
<td>[70, 80)%</td>
<td>C+ or B-</td>
</tr>
<tr>
<td>[60, 70)%</td>
<td>C-</td>
</tr>
<tr>
<td>&lt; 60%</td>
<td>D+ or lower</td>
</tr>
</tbody>
</table>

- There will be **one midterm**. Midterm and final exams will be in class, closed book. The date of the midterm exam will be announced at least two weeks before the exam.

**Academic Integrity**

The university expects all students to adhere to the University Honor Pledge: *I pledge on my honor that I have not given or received any unauthorized assistance on this assignment/examination.*

**Final comments**

The best way to learn is by doing. I recommend attempting as many exercises at the end of each chapter of the text as you can.
